Volume 13, Issue #29

**IMPORTANT:** This issue contains important operating information for all users of RSTARS and ADPICS. Please distribute promptly.

## **In this issue:**

- **MAIN FACS MODIFICATION – APPROPRIATION ALLOTMENT OVEREXPENDITURE ERRORS**

The following modification will be in production on Thursday, August 23, 2007:

### **MAIN FACS MODIFICATION – APPROPRIATION ALLOTMENT OVEREXPENDITURE ERRORS**

Previously, when the allotment control indicator was set to 1 on the Appropriation Number Profile screen (S020) and the remaining appropriation allotment on the Appropriation Financial Inquiry screen (S062) was negative, users could not cancel ADPICS purchase orders. Users were also prevented from posting expenditure credits (e.g., TC 412 or TC 191) unless the transaction made the remaining appropriation allotment positive.

The code has been modified so that users can cancel purchase orders and post expenditure credit transactions even if the remaining appropriation allotment is negative.
